

### Important to Business Men in Victoria, California, Portland, and Places on the Sound!

This Journal is the oldest newspaper published in British Columbia; is read by every business man from New Westminster to the Rocky Mountains, and is unrivalled as an advertising medium for this Colony. David Siskin, in Victoria, and L. P. Finnan, in San Francisco, are our authorized Agents.

This paper may be read gratuitously in London at the Central Establishment of "HOLLAND'S FILES AND OUTRIGERS," 24, Strand, where advertisements and subscriptions for the same are received.

### The British Columbian.

SATURDAY, JUNE 27, 1868.

#### PROGNOSTICATION.

The term for which the members of the Legislative Council of British Columbia received their appointment, expires on Tuesday next, "unless otherwise provided," and it is highly improbable that it will be otherwise provided. How far the Governor will recognize the "well understood wishes of the people" in reconstructing the Council remains to be seen. That His Excellency is invested with the requisite power we cannot doubt. The power which enabled him to outrage public decency by giving a certain individual a Seat in the House during last Session, would surely justify him in giving to the people enlarged representation, while the resolution passed during that Session, recommending that two-thirds of the Council should be elective, would be his warrant for so popular a concession. Upon the manner in which the next Council is formed will, in a great measure depend the popularity of the Governor and the contentment of the people. We do not mean to say that the people can possibly be contented under the present un-British system of Government. It is not at all desirable that they should. They would be unworthy of their ancestry and their nationality if they were. But we use the term in a restricted sense, signifying that comparative contentment which will avert open revolt while the people are employing every constitutional means within their reach for obtaining political liberty. Now that the Seat of Government has been carried away to Victoria, the Governor cannot afford to "pack" the Council with Victorians to the same extent that he has done in the past. The Mainland, conscious of its importance and jealous of its rights, won't put up with anything of the sort. The Mainland is clearly entitled to a large representation. Cariboo ought to have another member. The Middle, or Williams Lake, Districts ought to have one, and New Westminster District should, in all fairness, have another. If the people of the interior study their own interests they will elect at least Mainlanders to represent them, instead of selecting Victorians who neither know the Districts for which they sit, nor care a fig about the interests of their so-called constituents—who, having "an axe to grind," find it convenient to get simple people to turn the stone. Look, for instance, at Lillooet and Cariboo—the latter the most important District in the United Colony. At how many sittings of the Council did the so-called representatives of these Districts find it convenient to be present during last Session? Let the published Journals of the House answer. And when they were present, how much did the interests of their constituents trouble their brains? Not much. If it was the question of the Seat of Government that was to be discussed they were faithfully summoned from Victoria by telegraph. If the subject was one directly bearing upon a certain learned profession, or the constructing of a road or granting a bonus to a certain sawmill, these gentlemen trotted briskly up. But, beyond that, where were they? Where was Lillooet? Where was Cariboo? No where! It does not appear very certain whether Big Bend will retain its distinctive existence as a Legislative District. It is understood to have ceased as a Magisterial station, and its late Stipendiary Magistrate is "out of the service," while its popular representative has gathered up his traps and gone to—California! There are doubtless interests within the limits of the Columbia District which ought to be represented in the Legislature. But whether

that will be accomplished by a reconstruction and change of boundaries we have not the means of knowing. Of course it is early yet for electioneering, although we believe the Member for this District has already "gone the rounds"; not so much, we apprehend, on account of any anxiety about results, as from incidental circumstances and a general desire to cultivate a more intimate acquaintance with his constituents, and acquire a more thorough knowledge of the District. We hear that in Cariboo the ball has already commenced rolling, and that Mr. Walkem will be opposed by Mr. J. T. Scott, of the "Arcade." Who would ever have dreamed that Mr. Walkem had the most remote intention of again soliciting the suffrages of the "honest miners" of Cariboo? Certainly not those who witnessed the cold neglect which they received at his hands last Session. We have not the means of knowing how parties will shape on the Island. That Confederation will be the battle-cry, the great test, at the next election there cannot be a doubt. On the Mainland there can be no division on that point. All are Confederationists. There is not a community from the Mouth of the Fraser to the foot of the Rocky Mountains, and from the forty-ninth parallel of latitude to—we were going to say the North Pole, in which an anti-Confederationist could show his nose with the most remote chance of a following ever so small! It is to be apprehended, however, that the case of the Island is somewhat different. In the town of Victoria an anti-Confederation party, by no means contemptible either as regards numbers or influence, exists. This party will be materially strengthened by the presence of the Seat of Government, as the Officials are, almost without an exception, strongly opposed to Confederation. Their opposition is based upon the sufficiently cogent and tangible reason that the change would weaken their grasp upon the purse-strings of the Colony! Nor would it be matter of surprise should this party elect one of the city members. Will the District of Victoria be any better? Its very eccentric and by no means profound Representative of the past is not likely to again sacrifice his time for the amusement of Members. But it is to be feared that a District so very much permeated by Hudson Bay influence will continue to be represented, if not by a Tuffoon, at least by an opponent of the great movement. It would thus appear by no means improbable that two of the popular seats in the next Council will be filled by men hostile to Confederation. Beyond these ridings, however, we do not think that even the Island will swell the ranks of the enemy—the enemy to the best interests of the Colony. The Magisterial Member for Nanaimo, should his existence be sufficiently prolonged (We use the term figuratively) will doubtless again record his vote on the side of his "bread and butter." But it is impossible to believe that an anti-Confederationist can, in the popular sense, represent that important District. Even the most illiterate collier cannot but see that Confederation, with its accompanying Reciprocity Treaty, would be "the making" of Nanaimo. With the "Golden Gate" thrown open for the free admission of its coal to the San Francisco market, Nanaimo would literally bound onward in the path of prosperity. Nanaimo is certain to elect a staunch Confederationist. There is no denying the fact that to have two of the unofficial seats filled by men who will be prepared to cast their votes with the officials upon the all important question of Confederation, would be a condition much to be deplored, one which would place certain persons who aspire to lead in the movement in a somewhat awkward predicament. It is true that, should Victoria be divided upon this question to the extent we have indicated as possible, that town will occupy an invidious position in reference to the rest of the Colony, a position which could hardly fail to tell against her in the future. It is equally true that, by assuming such an attitude, she cannot prevent, although she may delay, Confederation. The Colony is for it—means to have it—will have it, in spite of Victoria, with all her official

backing and bolstering. Our advice to Victoria is to see to it that she is not eulched in the game! Success is sometimes defeat. Success in delaying Confederation would certainly prove defeat, bitter defeat in the sequel, so far as Victoria is concerned; and did we really wish her harm we would say, "go in and win!"

**ADDRESS**

TO THE

**NERVOUS AND DEBILITATED,**

WHOSE

**SUFFERINGS HAVE BEEN PRO-**

**TRACTED,**

AND WHOSE CASES

**REQUIRE PROMPT TREATMENT TO RENDER EXISTENCE DESIRABLE.**

If you are suffering have suffered, what effect does it produce upon your general health?

Do you feel weak, debilitated, easily tired?

Does a little extra exertion produce palpitation of the heart?

Does your liver, urinary organs, or your kidneys, frequently get out of order?

Is your urine sometimes thick, milky or floccy, or is itropy on settling?

Or does a thick scum rise to the top?

Or is a sediment at the bottom after it has stood awhile?

Do you have spells of short breathing or dyspnea?

Are your bowels constipated?

Do you have spells of fainting or rushes of blood to the head?

Is your memory impaired?

Is your mind constantly dwelling on this subject?

Do you feel dull, listless, moping, tired or company, or of life?

Do you wish to be left alone, to get away from every body?

Does any little thing make you start or jump?

Is your sleep broken or restless?

Is the lustre of your eye as brilliant?

The bloom on your cheek as bright?

Do you enjoy society as well?

Do you pursue your business with the same energy?

Are your spirits dull and sagging, given to fits of melancholy? If so, do not lay it to your liver or dyspepsia.

Have you restless nights? Your back weak, your knees weak, and have but little appetite and you attribute this to dyspepsia or liver complaint?

NOW, READER,

**DISEASES BADLY CURED, AND EXCESSES.**

Are capable of producing a weakness of the generative organs. The organs of generation when in perfect health, make the man. Do you ever think that those bold, defiant, energetic, persevering, successful business men are always those whose generative organs are in perfect health? You never hear such men complain of being melancholy, of nervousness, of palpitation of the heart. They are never afraid they cannot succeed in business; they don't become sad and discouraged; they are always polite and pleasant in the company of ladies, and look you and them right in the face—none of your downcast looks, or any other meanness about them. I do not mean those who keep the organs inflamed by running into excess. These will not only ruin their constitutions, but also those they do business with or for.

How many men, from badly-cured diseases and excesses, have brought about that state of weakness in those organs that has reduced the general system so much as to induce almost every other form of disease—idiotcy, insanity, paralysis, spinal affections, suicide, and almost every other disease which humanity is heir to, and the real cause of the trouble never suspected, and have died for all but the right one?

Diseases of this sort require a Diuretic.

**AYER'S MEDICINES.**

The peculiar taint or infection which we call SCROFULA lurks in the constitutions of multitudes of men. It either produces or is produced by an enfeebled, vitiated state of the blood, wherein that fluid becomes incompetent to sustain the vital forces in their vigorous action, and leaves the system to fall into disorder and decay. The scrofulous contamination is venously caused by mercurial disease, low living, disordered digestion from unhealthy food, impure air, silt and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children." The diseases it originates take various names, according to the organs it attacks. In the lungs, Scrofula produces tuberculosis, and finally Consumption; in the glands, swellings which suppurate and become ulcerous sores; in the stomach and bowels, derangements which produce indigestion, dyspepsia, and liver complaints; on the skin, eruptive and cutaneous affections. These, all having the same origin, require the same remedy, viz., purification and invigoration of the blood. Purify the blood, and these dangerous distempers leave you. With feeble, foul, or corrupted blood, you cannot have health; with that "life of the flesh" healthy, you cannot have scrofulous disease.

**Ayer's Sarsaparilla** is compounded from the most effectual antidotes that medical science has discovered for this afflicting distemper, and for the cure of the disorders it entails. That it is far superior to any other remedy yet devised, is known by all who have given it a trial. That it does combine virtues truly extraordinary, in its effect upon this class of complaints, is indisputably proven by the great multitude of publicly known and remarkable cures it has made of the following diseases: King's Evil, or Glandular Swelling, Tumors, Eruptions, Pimples, Blisters and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and Syphilitic Infections, Menstrual Diseases, Female Weaknesses, and, indeed, the whole series of complaints that arise from impurity of the blood. Minute reports of individual cases may be found in AYER'S AMERICAN ALMANAC, which is furnished to the druggists for gratuitous distribution, wherein may be learned the directions for its use, and some of the remarkable cures which it has made when all other remedies had failed to afford relief. Those cases are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresses the vital energies, and thus leaves its victims far more subject to disease and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vast importance of these considerations has led us to spend years in perfecting a remedy which is adequate to its cure. This we now offer to the public under the name of AYER'S SARSAPARILLA, although it is composed of ingredients, some of which exceed the best of Sarsaparilla in alternative power. By its aid you may protect yourself from the suffering and danger of these disorders. Purge out the foul corruptions that rot and fester in the blood, purge out the causes of disease, and vigorous health will follow. By its peculiar virtues this remedy stimulates the vital functions, and thus expels the distempers which lurk within the system or burst out on any part of it.

We know the public have been deceived by many compounds of Sarsaparilla, that promised much and did nothing; but they will neither be deceived nor disappointed in this. Its virtues have been proven by abundant trial, and there remains no question of its surpassing excellence for the cure of the afflicting diseases it is intended to reach. Although under the same name, it is a very different medicine from any other which has been before the people, and is far more effectual than any other which has ever been available to them.

## VALUABLE TESTIMONY.

We felt it our duty to allude, on Wednesday, to a most uncalled for and apparently malicious attack made upon Mr. A. N. Birch, in a recent issue of the *Colonist* newspaper. Few, we imagine, will be found outside of Victoria, disposed to doubt, much less contradict, the statement that the gentleman in question stands well, and deservedly so, in this Colony. The following extract, which we clip from the *Victoria Morning News*, a paper which panders to no party—is under the thumb of no monopoly, will tend to show not only that what we have said is true of the Mainland, but that it is to some extent true of the very community in which the *Colonist* is published. The fact that this testimony comes spontaneously from a Victoria newspaper, cannot but enhance its value, under all the circumstances. Clearly the *Colonist* does not represent popular opinion, in this instance at least; and there is good ground for apprehending that the very objectionable article was inspired by personal animus. Referring to it, the *Morning News* says:—"It is true, Mr. Birch is not looked on with much favor in Victoria; but that does not justify the sweeping assertion that he is held in detestation by the community over which, for a brief period, he exercised the high office of Acting Governor. There is not a word of truth in that statement. Mr. Birch on the contrary, is highly esteemed by the people generally on the mainland, who look upon him as a young man of rare ability, and whose administration of the 'high office of Acting Governor,' during a very critical period in the history of the mainland colony, was marked by a degree of judgment, prudence, and solicitude for the welfare of the country, committed temporarily to his charge, scarcely to be looked for at the hands of a gentleman not thirty years of age. The fact that he took a warm interest in the welfare of the mainland colony as against that of Vancouver Island, with which he had no political connection whatever, we hold to be a credit to him rather than a cause for reasonable censure, and if it proves anything, it proves that if he were Governor of the united colonies, now that the questions of capital, collection of customs dues, etc., which gave rise to some what bitter sectional controversy, are set at rest, he would enter upon the duties of his high office perfectly free from those sectional predilections which marked his course both as Colonial Secretary and Acting Governor of the Mainland."

## AGRICULTURE.

It is most gratifying to observe a growing disposition, especially in this section of the Colony, to engage in agricultural pursuits. This is gratifying for two reasons: It will greatly tend to the permanent prosperity of the country; while it will equally promote the welfare of those engaged in it. We have long deplored the fact that something like half a million of dollars of our money finds its way every year into the pockets of the foreign producer, in payment for such articles as our own soil and climate are so well calculated to produce. The increased disposition to engage in farming promises to cure this evil before long. We have intimated that farming is profitable in this District. As a matter of course one is met by the usual growl about falling prices, and a limited market; but what country is or ever was free from these? None that we have ever read or heard of. If one thing struck us more than another, during a recent visit to Burrard Inlet, it was the absence of any effort to supply the demand for vegetables. There were ten ships in the harbor. These ten ships would not probably have less than one hundred and fifty men employed about them. We all know the cravings for fresh vegetables and greens of all sorts which a long sea voyage creates. Just imagine what havoc one hundred and fifty men coming off a long sea-voy-

age would make! Potatoes, carrots, onions, beets, rhubarb, peas, beans, cucumbers, salad, berries of all sorts, corn, tomatoes, turnips, radishes, and the many other little things included in a market garden, how they would disappear before these sturdy sons of old Neptune! Yet, strange to say, no attempt appears to be making to take advantage of so obvious an opening. This particular market is of course somewhat limited at present; but like all else, it is only in embryo, and the demand will expand with the increased means of supply. We mention this as only one of the many openings to which some persons would do well to turn their attention, instead of spending precious time in croaking about there being no market.

## SHEEP FARMING.

The rate at which sheep are coming into the Mainland part of the Colony this season leads one to hope that the improvident policy of eating foreign mutton is fast coming to an end. Already have something like four thousand sheep been brought in, chiefly for breeding purposes, and the season is not more than half spent yet. We are told that there is almost boundless scope for sheep-walks in the interior, taking the vast sweep of magnificent grazing and agricultural country from the great Okanagan, through by Kamloops, Bonaparte, and Hat Valley. Should the Colony prove favorable for sheep raising—and we are assured the fact has been already demonstrated—there can be no doubt of the rapid expansion of this branch of business, and of the great benefits it must confer upon the Colony, in various ways. With a suitable climate, abundant room, and proper facilities no more lucrative business can be engaged in.

**CHEESE MAKING.**—The farmers in this District are beginning to turn their attention to cheese-making. This is as it should be. Hitherto effort has been too exclusively directed towards one branch; and the consequence has been that some particular branch has been overdone. If all the farmers go into butter making *per se*, the market will become depressed, while large sums will be sent abroad for cheese. But if each farmer would do a little in each branch the result would be much more satisfactory to all concerned. In crops farmers should aim at such variety as may be suited to the market and to their land. In stock they should endeavor to carry out the same policy. Nor should they forget that although the manufacturer too frequently separates the two articles of butter and cheese, the consumer reunites them. There is a disposition to overlook "little things" in farming as in everything else.

**WELL DESERVED.**—We see by the *COLUMBIAN* that the Hon. John Robson, M.L.C. for the City and District of New Westminster, has been presented with an Address, signed by one hundred and fifty of his constituents, acknowledging the value of his services as their representative and pledging themselves to re-elect him should he again consent to serve them in the Legislative Council. But the Address was not the only token of the high estimation in which that gentleman is held by his constituents. Accompanying it they placed in his hands a purse containing the handsome sum of \$600 in gold coin, "as a small offset to the financial losses which he has sustained, directly and otherwise, consequent upon his accepting and filling the position of member for New Westminster." We think Mr. Robson well deserves both the Address and the money, and congratulate him upon the reception of such a substantial token of the good-will of his fellow-citizens.—*Victoria Morning News*.

**ROAD TOLLS ON FLOUR.**—It would appear that the absurd anomaly of charging Road Tolls upon colonial flour, while wheat is exempt, still exists, thus directly taxing and discouraging local manufacture. It will be recollected that during the Session before last the Member for New Westminster got a Resolution through the House, for the abolition of this tax upon industry. Why has not the Executive removed it?

**Too BAD.**—The Government has not only robbed New Westminster of the Capital but the Chief Commissioner has carried away property belonging to the Municipality, and adds insult to injury by ignoring the claim. It is no secret that Gen. Moody, at the sale of loose property belonging to the Royal Engineer's establishment at the Camp, prior to the disbanding the corps, reserved a set of jack-screws for the use of the town. These, with some other articles, the Chief Commissioner carried off to Victoria. The Municipal Council has been in correspondence upon the subject, but the Chief Commissioner disputes the right of New Westminster to the property in question. Should it be considered worth while following the matter up it will be necessary, we presume, either to take legal proceedings against Mr. Trutch, or refer the matter to General Moody.

**BRIGHTON.**—Already have several families availed themselves of this, our embryo "watering place". Burrard Inlet is rapidly increasing its attractions as a resort for those in quest of health and pleasure. Mr. Hocking, of the Brighton Hotel, has not been idle; and visitors will now find very comfortable quarters. The great facilities offered by the daily stage line kept up by Mr. Lewis, of this city, must have a tendency to increase the traffic with the Inlet. Talking of health, and those in pursuit of it, quite a number of Victoria invalids have recruited their health in New Westminster within the past few months! There is no denying that the climate here is much superior to that of most other places.

**THE ship Anna Schmidt**, which was destroyed by the Alabama off the coast of South America, had on board a quantity of Ayer's Cherry Pectoral for California. Dr. Ayer & Co. now appeal for redress direct to the British Government, as the responsible party in this wicked business, and base their claim for payment and protection on the ground of humanity, as their commodities are wholly for the sick. Their point is well taken, and will doubtless be pressed with the pluck and persistency which characterize the operations of these celebrated chemists.—*Baltimore Clipper*.

**What kind of Guns, Captain?** Pop Guns? No, no, I mean "Gunn's Family Physician, or Home Book of Health." It should be in every family. It has been the means of saving many lives. Those, especially, who reside at a considerable distance from a Physician should not be without this valuable work. G. C. Clarkson & Co. have plenty of them and sell them at \$8 50 each.

**FROM YALE.**—The str. Reliance, Capt. Irving, returned from Yale yesterday. She brought a local express, a number of passengers, and four fat cattle from Chilliwack, for Mr. Dickenson. There is no news of importance. The water in the Fraser is now at the highest stage it has been this year, although still some ten feet below extreme high-water mark.

**MYSTERIOUS!**—Our readers will regret to hear that Governor Seymour does not at all enjoy good health at Victoria. Some blame the climate; others blame "Bleak House", alias "Cary Castle", and the old story about the castle being haunted is even mentioned by some, in connection with His Excellency's ill-health, and evident antipathy to the place.

**THE AGRICULTURAL MEETING.**—We would remind the Members of the Central Committee of the New Westminster District Agricultural Society, of the Meeting on Tuesday evening, at 8 o'clock. It is hoped that every member will make it a matter of duty to be present.

**MORE SHEEP.**—The str. Emma, Capt. Peter Holmes, arrived from Olympia, W. T., on Thursday, with a drove of sheep, about 200 in number, for Mr. Samuel Farr, who is taking them up to his Ranch (late Coe's Ranch) above Harrisonmouth. The Emma will sail for Victoria to-day.

**ST. JOHN'S DAY AT VICTORIA.**—The Free Masons had their usual celebration on St. John's day. Bishop Hills preached the sermon! Where was their own Chaplain? We understand that the Bishop does not even belong to the Order.

**VICTORIA ITEMS.**—A fire occurred a few days ago in "Bleak House." The precise extent of damage had not transpired, but the Insurance Companies had been called upon to pay. The Chief Commissioner is inviting tenders for certain additions to the house!

**UNION PIC-NIC.**—A picnic, in connection with the Methodist and Presbyterian Sabbath Schools of this City, will take place to-day, on the Cricket ground, commencing at 1 o'clock.

**AUCTION SALE.**—It will be seen by reference to our advertising columns that Mr. H. V. Edmonds will hold another of his interesting sales of miscellaneous articles on Monday next.

**FROM VICTORIA.**—The str. Enterprise, Capt. McNeil, arrived from Victoria last evening with freight and passengers.

## TELEGRAPHIC SUMMARY.

European despatches are to the 20th inst., but are unimportant. The anniversary of the accession of the Queen to the Throne was celebrated in the Metropolis. The Irish Suspension Bill passed a first reading in the House of Lords, on the 19th. Lord Strathearn presented a petition from the people of Nova Scotia against the Canadian Act of Union. In the House of Commons on the 20th, the Irish Reform Bill was read a second time. The *London Telegraph* has been condemned to pay £300 sterling for libel. In Paris on the 19th, a solemn requiem Mass was performed in commemoration of the death of Maximilian, it being the anniversary of his execution. The ex-Empress Carlotta, Gen. Mirapou, and a large number of Mexicans were present.

As San Francisco, on the 20th, a fire occurred in the store of A. Greenbaum & Co., 225 Front street, dealers in cigars and Yankee notions, etc., by which the entire stock was consumed. Loss, \$89,000. Heink and Luke, cigar dealers, also lost about \$30,000.

**COMMERCIAL PLUCK.**—The removal of the Seat of Government appears in no way to have damped the enterprise or weakened the confidence of J. S. Clute. At least one might fairly come to this conclusion on seeing the large and varied stock of new goods which he received by last steamer, and which he is now opening up for sale, including the very latest styles, and the most tempting patterns yet brought to this market.

**HOLLOWAY'S PILLS.**—The Great Need—The blood is the life, and on its purity depends our health, if not our existence. These Pills thoroughly cleanse this vital fluid from all contaminations, and by that power strengthen and invigorate the whole system, healthily stimulate sluggish organs, repress overexcited action, and establish order of circulation and secretion throughout every part of the body. The balsamic nature of Holloway's Pills commends them to the favor of debilitated and nervous constitutions, which they soon rectify. They dislodge all obstructions, both in the bowels and elsewhere, and are, on that account, much sought after for promoting regularity of action in young females and delicate persons, who are naturally weak, or who from some cause have become so.

## ALL OVER

The world people of sense and judgment have learned to use

## PLANTATION BITTERS.

Dyspepsia, with its symptoms, Headache, Heartburn, Flatulent Lipo, Bad Breath, Salivary Complication, &c., can be cured by using PLANTATION BITTERS.

This is the most successful tonic of the age. Young, middle-aged and old, are delighted with its effects. The first trial always has a marked good effect.

No change of diet is necessary. But all you wish, of the best and most nutritious food.

It is the greatest cure ever known for an overloaded and disordered stomach, which it relieves in a few moments.

We know that we have the best and most popular medicine in the world. We are not afraid to show what it is composed of.

Physicians are compelled to recommend it.

CALIFORNIA BARK has been celebrated for over two hundred years, and was sold during the reign of Louis XVI, King of France, for the enormous price of 100,000 francs in silver. It is remarkable for Dyspepsia, Fevers, Weakness, Constipation, &c.

CALIFORNIA BARK.—For Diarrhoea, Colic, and diseases of the stomach and bowels.

DYSPEPSIA.—For inflammation of the Lungs and Dropsical Affections.

CHRONIC FLOWERS.—For enfeebled digestion, LIVER DYSPEPSIA.—Aromatic, stimulant and tonic—highly invigorating in nervous debility.

WINDBORER.—For Scrophulous, Rheumatism, &c.

ANISE.—An aromatic carminative; creating flesh, muscle and milk; much used by mothers nursing.

Also clove-buds, orange, caraway, coriander, snake-root, &c.

They are recommended by the highest medical authorities, and are warranted to produce an immediate beneficial effect. They are exceedingly agreeable, perfectly pure and harmless.

Verily, any person pretending to sell Plantation Bitters in bulk or by the gallon is a swindler and impostor. It is put up only in our log cabin bottle. Beware of bottles rolled with imitation, deleterious stuff, for which several persons are already in prison. See that every bottle has our United States stamp over the cork unimpaired, and our signature on steel plate side label.

Sold by respectable dealers throughout the habitable globe.

P. H. Drake & Co., New York, Sole Proprietors.

Redington & Co., San Francisco, Agents for California and Nevada.

YADA.

MEXICAN MUSTANG LINIMENT.

The merits of this Liniment are well known. Its effects are instantaneous, soothing, and wonderful.

Cuts, bruises, sprains and swellings, are so common, and certain to occur in every family, that a bottle of this Liniment is the best investment that can be made.

It is more certain than the doctor—it saves time in sending for the doctor—it is cheaper than the doctor, and should never be dispensed with.

READ THE FOLLOWING.

"I take pleasure in recommending the Mexican Mustang Liniment as a valuable and indispensable article for Sprains, Sores, Scalds, or Cuts on horses. Our men have used it for Burns, Bruises, Sores, Rheumatism, &c. and all say it acts like magic." J. W. HERRICK, Foreman for Ames, Wells, Fargo & Harnden's Express.

"The sprain of my daughter's ankle, occasioned while skating last winter, was entirely cured in one week after she commenced using your celebrated Mustang Liniment." Ed. SEELY, Gloucester, Mass., Aug. 1, 1868.

Quick and sure it certainly is. All genuine is wrapped in steel plate engravings, bearing the signature of P. H. Drake & Co., and the PRIVATE U. S. stamp of DEAN RAYNES & Co., over the top.

An effort has been made to counterfeit it with a cheap stone plate label. Look closely!

Sold by all Druggists and Stores, at 25¢ per bottle, and \$1 per dozen.

LYON'S MAGNETIC POWDER

for exterminating insects and vermin, with entire satisfaction.

COLEMAN & STEPHENSON, Astor House.

T. COVENS, American Hotel.

ACKER & TREADWELL, St. Nicholas Hotel.

S. DELAND & CO., Metropolitan Hotel.

Testimony of this character might be added to any length. Wherever it is used it advances itself.

The genuine has the signature of E. LYON, and the private stamp of DEAN RAYNES & Co. Anything else of this kind is an imitation or counterfeit. Any druggist will procure the genuine if you insist: you will have one other.

Sold by all druggists and general storekeepers in every town and mining camp on the Pacific Coast.
